

CITY WHARF

City Wharf 2009

City Wharf is designed to meet the needs of the modern office. This prestigious development offers individual and contemporary space for dynamic businesses.

In an image conscious world, offices can reflect the aspirations of the occupier, and help them create new business opportunities.

The impressive offices on the final phase of City Wharf are designed to make the best of impressions, and are efficient as single buildings or divided into separate floors.

These two offices complete the City Wharf scene and have deservedly impressive entrances.

Each office has its own private parking spaces alongside the building.

An outline of the office sizes, layouts and specifications is shown on the inserts at the back of the brochure.
